

HAZARDOUS MATERIALS

The Avery County Board of Education recognizes its responsibility for providing an environment which is reasonably secure from known hazardous materials. These materials include any substance or mixture of substances that poses a fire, explosive, reactive or health hazard as more fully defined by law.

The superintendent or his or her designee will develop procedures or programs as necessary to address compliance with applicable laws and regulations and the following board requirements:

- purchasing, storing, handling, transporting and disposing of hazardous materials for all school facilities must be addressed in a reasonably safe manner;
- substituting less dangerous substances for hazardous materials will be accomplished whenever feasible; and
- training will be provided to appropriate school personnel on precautions to prevent accidents and to handle accidents in the event they occur.

The superintendent, principals and other building-level supervisors will be responsible for monitoring compliance with this policy, administrative procedures, and applicable laws and regulations.

Any individual who is concerned that a hazardous material is not being handled properly or that a hazardous material may cause an unreasonable risk to safety should notify the principal, building-level supervisor or superintendent or designee immediately.

It is not the intent of the board to expand or modify the school district's potential liability exposure through the adoption of this policy. The school district's voluntary compliance with any statute or regulation to which it is not otherwise subject will not be construed to create or assume any potential liability under any local, state or federal law or regulation.
